Anno Domini 2006 New Features Overview

Anno Domini 2006 contains 10 major new features from the last release of Anno Domini 2005 as noted below.

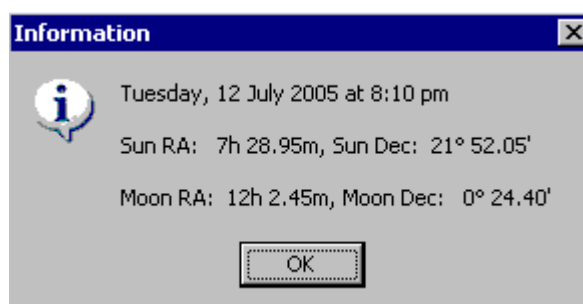

New On This Day

The On This Day tab has been completely re-designed in terms of look and feel with a larger content area. Each of the Internet links has been revised to access News/Weather/Sport services from the Internet. The Chronicle button now accesses the BBC based On This Day library and the Birthdays button displays birthdays of famous people from the Biography channel.

Right Ascension and Declination of the Sun/Moon

In the Astronomy tab, double-clicking the mouse on the Sun's Azimuth/Sun's Altitude or Moon's Azimuth/Moon's Altitude entries displays a new dialog showing the current Right Ascension in hours and minutes and the Declination in degrees, minutes and seconds of the Sun and the Moon.

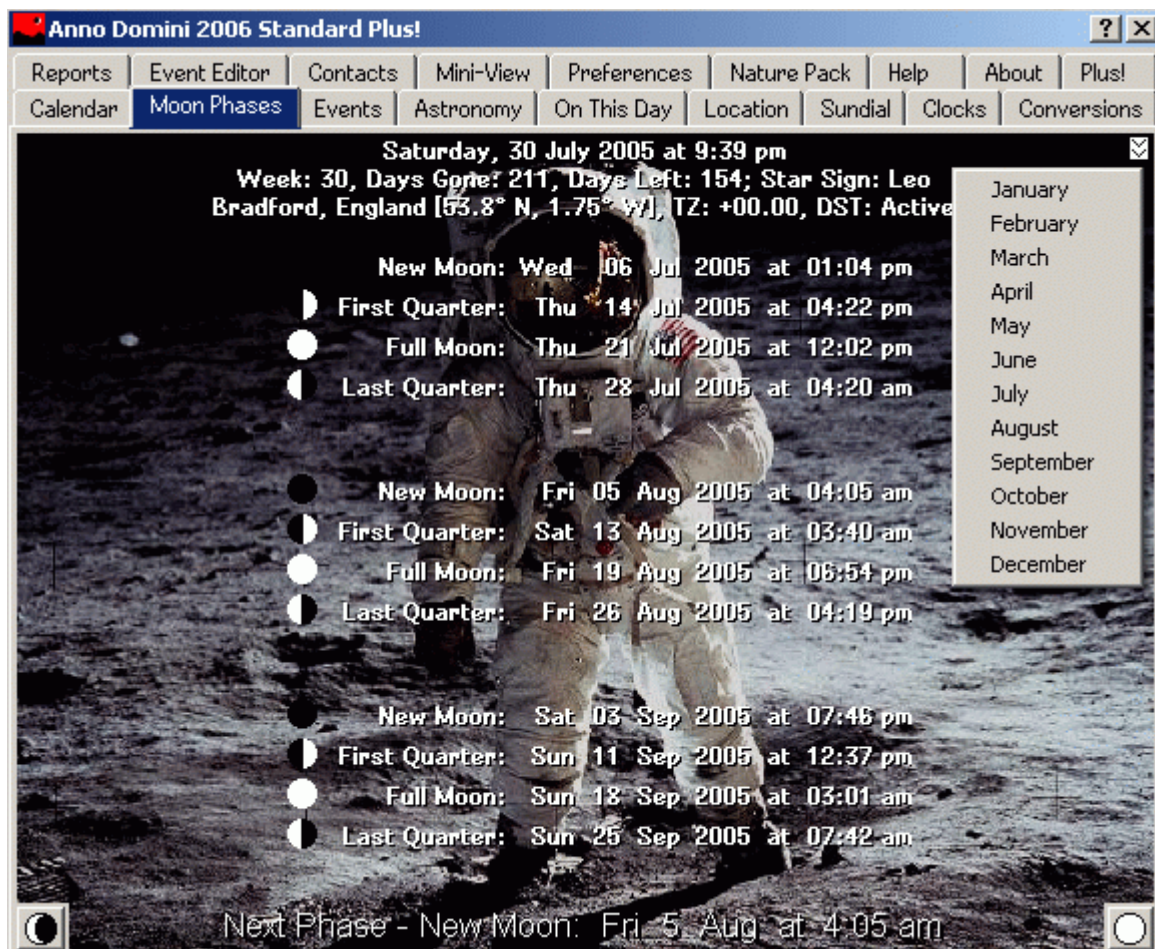

Atomic Clock Synchronization

New to Anno Domini 2006 is automatic synchronization of the PC clock. At three separate time intervals during the day (10:00am, 3:00pm and 8:00pm), Anno Domini will automatically connect to an Internet Time Server and ensure your clock is adjusted to match the exact atomic time accurate to thousands of a second. Plus! Pack users have the extra benefit of access to a control panel allowing the PC clock to be adjusted at any time. Other benefits include being able to interrogate the Atomic Clock Server to see the difference between the PC clock and Atomic Clock and being able to change the default server from one on ten servers provided. The server list is also dynamically updated via the Anno Domini web-site.

Moon Phases Month Selector

In the Moon Phases tab, the top right-hand corner now displays two arrows on a white background which when clicked on with the mouse displays a drop-down menu of all the calendar months which allows users to select the starting month of the Moon Phases which are displayed in the tab.

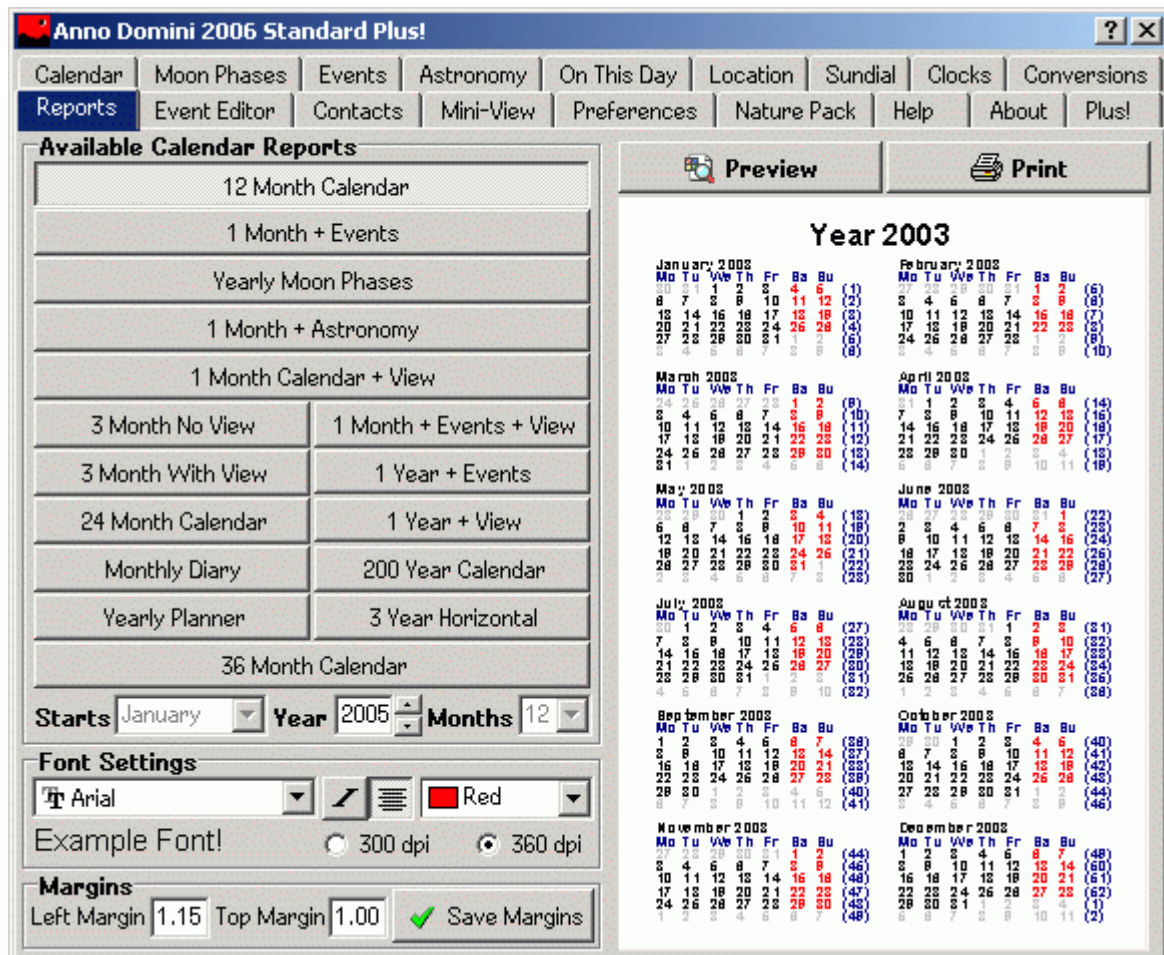

Christian To Jewish Date Conversion

From the main Calendar date, double clicking the mouse on any calendar date will display a new dialog showing the Jewish date equivalent, the Roman year displayed in Roman Numerals and other statistics such as Days Gone, Days Left and the Astrological Star Sign for the chosen date.

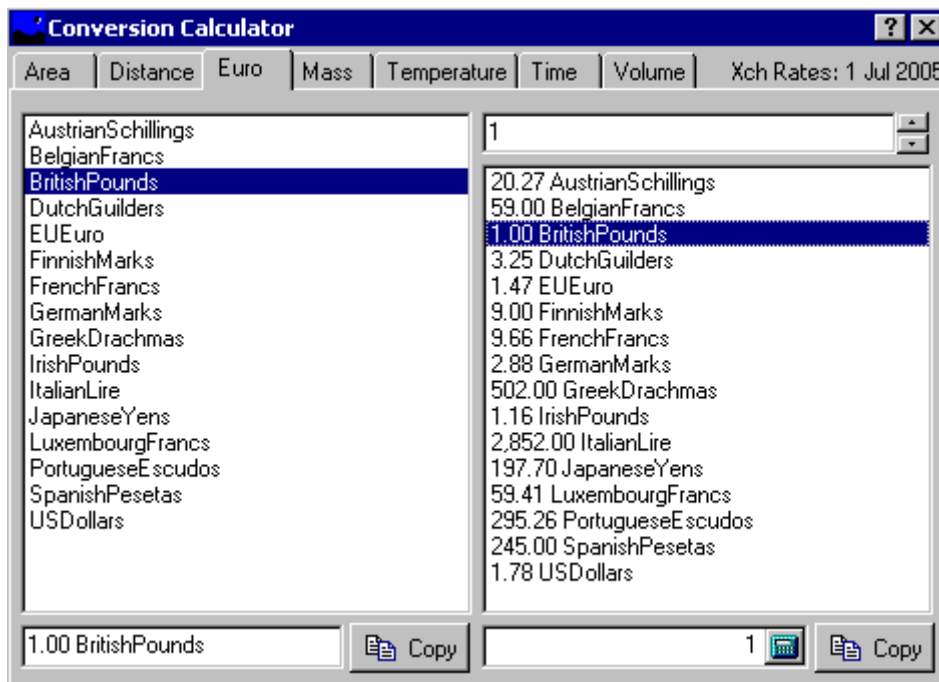

Italic Fonts and Centre Headers in Calendar Reports

Two new buttons have been added to the **Font Settings** section of the Reports tab. The Italic button will display the report with an Italic typeface which can be turned on or off for each individual report and memorized. The Centre button controls whether the header of each Calendar report is either Left-justified or centred.

Conversion Calculator

The Conversions tab (exclusive to Plus! Pack users) contains 168 new conversion calculations split into 7 topics - Area, Distance, Euro, Mass, Temperature, Time and Volume. Results can be manipulated using a drop-down calculator function. Currency rates for Euros, US Dollars, GB Sterling and Japanese Yen are automatically updated via the Internet.

Revised Nature Packs

All three Nature packs have been completely revised and are now notably smaller in file size reducing download times.

Anno Domini 2006 Standard Plus! [?] [X]

Calendar | Moon Phases | Events | Astronomy | On This Day | Location | Sundial | Clocks | Conversions
 Reports | Event Editor | Contacts | Mini-View | Preferences | **Nature Pack** | Help | About | Plus!

January 	February 	March 	April 
May 	June 	July 	August 
September 	October 	November 	December 

Nature 2

Calendar | Moon Phases | Events | Astronomy | On This Day | Location | Sundial | Clocks | Conversions
 Reports | Event Editor | Contacts | Mini-View | Preferences | **Nature Pack** | Help | About | Plus!

January 	February 	March 	April 
May 	June 	July 	August 
September 	October 	November 	December 

Nature 3

Automatic Opening of Anno Domini During Multiple Execution

Anno Domini 2006 now automatically detects if an attempt is made to run more than one copy of the program at a time and, in such instances, rather than display a warning message, the already running copy of Anno Domini is now opened on the desktop from the TaskBar.

Use of WinRAR Compression Libraries

WinRAR compression software is now used to deploy the Anno Domini updates and the Plus! Pack upgrades enabling smaller downloads from the Anno Domini web-site and results in quicker installation.
